public class teme{
      public static void main(String[] args) {
            Scanner ts = new Scanner(System.in);
            int n = ts.nextInt();
            do {
                  int q=(int)Math.pow(a,2);
                  sum=sum+q;
                  a++;
            }while(a<=n);
            System.out.println("suma="+sum);
                  ts.close();
            }

      }
```

```java
public class teme{
      public static void main(String[] args) {

            int a=1;
            do {
                  int s=1;
                  do {
                        System.out.printf("%5d",s);
                        s++;
                  }while(s<=a);
                  System.out.println();
                  a++;
            }while(a<=5);

      }
}
```
Output:

```
    1
    1    2
    1    2    3
    1    2    3    4
    1    2    3    4    5
```
